

INTERNATIONAL CONFERENCE ON 'RECENT TRENDS IN BIOLOGICAL SCIENCES'

DATE: 3RD & 4TH JUNE 2020

The world is undergoing a change of perception of life due to the tremendous impact of COVID-19 on the lives of every living organism. Biology is the natural science that studies life and living organism, including their physical structure, chemical processes, molecular interactions, physiological mechanisms, development and evolution.

There are many countries leading in the field of biological research. The COVID-19 pandemic has proved to be a game changer in the field of research and underlined the need for collaborative research. The greatest challenge of many countries will be in educating, recruiting, and supporting its next generation scientists, academicians, policy makers and students in the field of biological sciences in broader perspective. The goal of this conference is to provide a common platform for researchers, academicians and students to share their knowledge about the recent developments in the field of Biological Sciences.

The broad theme of the conference, but not limited to, will cover the following areas of Biosciences:

- ♣ Biodiversity and Conservation Biology
- ♣ Plant & Animal Physiology and Biochemistry
- ♣ Immunology and Parasitology
- ♣ Aquatic Biology and Entomology
- ♣ Developmental Biology
