EMBRACING DIGITAL EDUCATION

a three-day Hands-on Workshop (15th - 17th June 2020)

ABOUT THE WORKSHOP

Traditionally, education that was imparted to the learners has not been changed a lot since the last decade. Technology was always only an option to effective teaching, learning and evaluation. But the recent paradigm shifts in Modern Education has made Digital Technology become an essential tool towards effectively carrying out various effective pedagogies. This Hands-on Workshop puts the participants in the scenario of a learner in an online Digital Classroom and they would experience asynchronous remote Teaching, Learning and Evaluation through a series of assignments, quizzes and interactive media.

A Three-day hands-on workshop of activities, talks and learning
