# SJC faculty member gets best computer science faculty award

TIMES NEWS NETWORK

Trichy: Vimal Jerald, a computer science faculty member from St Joseph's College (SJC), Trichy, has won the internationally acclaimed 9th Association of Scientists, Developers and Faculties (ASDF) Global Awards, 2019 for the best computer science faculty.

He received the award from Kanagasingam, (second from right), rector, Eastern University, Sri Lanka in an event held at Chennai on Monday. ASDF is a UK-based organization which felicitates researchers and academicians for their outstanding work.

Over 11,000 teachers, scientists and researchers had applied for the award this year for five categories. A candidate is put to a five stage scrutiny for the award. Data related to research articles, details on guiding students for their projects apart from research project, academic activity on the methodology adopted for

classroom teaching are taken up for scrutiny.

In the next stage, a team carries out physical verification of the candidates at their respective colleges following which the candidate is asked to produce his or her biography in the form of a video clip. Details of the candidates nominated for the award are shared on social media platforms for public opinion.

The award recognises faculty members for their effective teaching methodology using Information and communication technology (ICT) tools.

Vimal Jerald says ICT tools can play a vital role in teaching and learning process. "I ask students to make use of online messaging platform to interact with me and clear their doubts outside the classroom if they have any sort of hesitation to ask doubts in front of others in the classroom. I also encourage peer learning by facilitating group discussion among students," he said.

While it cannot be substitute for conventional teaching, it can do wonders in terms of facilitating poor learners to learn on their own, he said.

Congratulating Vimal for winning the award, SJC principal M Arockiasamy Xavier said that the college is focusing on the areas of research, incubation and innovation.
