## **LOCF SYLLABUS 2025**

### **Department of Counselling Psychology**

School of Management Studies  
St. Joseph's College (Autonomous)  
Tiruchirappalli - 620002, Tamil Nadu, India

## **SCHOOLS OF EXCELLENCE WITH CHOICE BASED CREDIT SYSTEM (CBCS) POSTGRADUATE COURSES**

St. Joseph's College (Autonomous), an esteemed institution in the realm of higher education in India, has embarked on a journey to uphold and perpetuate academic excellence. One of the pivotal initiatives in this pursuit is the establishment of five Schools of Excellence commencing from the academic year 2014-15. These schools are strategically designed to confront and surpass the challenges of the 21st century.

Each School amalgamates correlated disciplines under a unified umbrella, fostering synergy and coherence. This integrated approach fosters the optimal utilization of both human expertise and infrastructure. Moreover, it facilitates academic fluidity and augments employability by nurturing a dynamic environment conducive to learning and innovation. Importantly, while promoting collaboration and interdisciplinary study, the Schools of Excellence also uphold the individual identity, autonomy, and distinctiveness of every department within.

The overarching objectives of these five schools are as follows:

1. Optimal Resource Utilization: Ensuring the efficient use of both human and material resources to foster academic flexibility and attain excellence across disciplines.
2. Horizontal Mobility for Students: Providing students with the freedom to choose courses aligning with their interests and facilitating credit transfers, thereby enhancing their academic mobility and enriching their learning experience.
3. Credit-Transfer Across Disciplines (CTAD): The existing curricular structure, compliant with regulations from entities such as TANSCHE and other higher educational institutions, facilitates seamless credit transfers across diverse disciplines. This underscores the adaptability and uniqueness of the choice-based credit system.
4. Promotion of Human Excellence: Nurturing excellence in specialized areas through focused attention and resources, thus empowering individuals to excel in their respective fields.
5. Emphasis on Internships and Projects: Encouraging students to engage in internships and projects, serving as stepping stones toward research endeavors, thereby fostering a culture of inquiry and innovation.
6. Addressing Stakeholder Needs: The multi-disciplinary nature of the School System is tailored to meet the requirements of various stakeholders, particularly employers, by equipping students with versatile skills and competencies essential for success in the contemporary professional landscape.

In essence, the Schools of Excellence at St. Joseph's College (Autonomous) epitomize a holistic approach towards education, aiming not only to impart knowledge but also to cultivate critical thinking, creativity, and adaptability – qualities indispensable for thriving in the dynamic global arena of the 21st century.

### **Credit system**

The credit system at St. Joseph's College (Autonomous) assigns weightage to courses based on the hours allocated to each course. Typically, one credit is equivalent to one hour of instruction per week. However, credits are awarded regardless of actual teaching hours to ensure consistency and adherence to guidelines.

The credits and hours allotted to each course within a programme are detailed in the Programme Pattern table. While the table provides a framework, there may be some flexibility due to practical sessions, field visits, tutorials, and the nature of project work.

For postgraduate (PG) courses, students are required to accumulate a minimum of 92 credits, as stipulated in the programme pattern table. The total minimum number of courses offered by the department is outlined in the Programme Structure.

### **OUTCOME-BASED EDUCATION (OBE)**

OBE is an educational approach that revolves around clearly defined goals or outcomes for every aspect of the educational system. The primary aim is for each student to successfully achieve these predetermined

outcomes by the culmination of their educational journey. Unlike traditional methods, OBE does not prescribe a singular teaching style or assessment format. Instead, classes, activities, and evaluations are structured to support students in attaining the specified outcomes effectively.

In OBE, the emphasis lies on measurable outcomes, allowing educational institutions to establish their own set of objectives tailored to their unique context and priorities. The overarching objective of OBE is to establish a direct link between education and employability, ensuring that students acquire the necessary skills and competencies sought after by employers.

OBE fosters a student-centric approach to teaching and learning, where the delivery of courses and assessments are meticulously planned to align with the predetermined objectives and outcomes. It places significant emphasis on evaluating student performance at various levels to gauge their progress and proficiency in meeting the desired outcomes.

Here are some key aspects of Outcome-Based Education:

**Course:** A course refers to a theory, practical, or a combination of both that is done within a semester.

**Course Outcomes (COs):** These are statements that delineate the significant and essential learning outcomes that learners should have achieved and can reliably demonstrate by the conclusion of a course. Typically, three or more course outcomes are specified for each course, depending on its importance.

**Programme:** This term pertains to the specialization or discipline of a degree programme.

**Programme Outcomes (POs):** POs are statements that articulate what students are expected to be capable of by the time they graduate. These outcomes are closely aligned with Graduate Attributes.

**Programme Specific Outcomes (PSOs):** PSOs outline the specific skills and abilities that students should possess upon graduation within a particular discipline or specialization.

**Programme Educational Objectives (PEOs):** PEOs encapsulate the expected accomplishments of graduates in their careers, particularly highlighting what they are expected to achieve and perform during the initial years postgraduation.

## **LEARNING OUTCOME-BASED CURRICULUM FRAMEWORK (LOCF)**

The Learning Outcomes-Centric Framework (LOCF) places the learning outcomes at the forefront of curriculum design and execution. It underscores the importance of ensuring that these outcomes are clear, measurable, and relevant. LOCF orchestrates teaching methodologies, evaluations, and activities in direct correlation with these outcomes. Furthermore, LOCF adopts a backward design approach, focusing on defining precise and attainable learning objectives. The goal is to create a cohesive framework where every educational element is in harmony with these outcomes.

Assessment practices within LOCF are intricately linked to the established learning objectives. Evaluations are crafted to gauge students' achievement of these outcomes accurately. Emphasis is often placed on employing authentic assessment methods, allowing students to showcase their learning in real-life scenarios. Additionally, LOCF frameworks emphasize flexibility and adaptability, enabling educators to tailor curriculum and instructional approaches to suit the diverse needs of students while ensuring alignment with the defined learning outcomes.

### **Some important terminologies**

**Core Courses (CC):** *These are compulsory courses that students must undertake as essential components of their curriculum, providing fundamental knowledge within their primary discipline. Including core courses is essential to maintain a standardized academic programme, ensuring recognition and consistency across institutions.*

**Discipline Specific Elective Courses (ES):** *Elective courses are offered within the main discipline or subject of study. They allow students to select specialized or advanced options from a range of courses, offering in-depth exposure to their chosen area of study. Typically, ES are more applied in nature and provide a deeper understanding of specific topics.*

**Research Methodology/IPR(RM):** It is a two-credit course offered in the third semester as a common program across disciplines within the school. It is designed to acquaint postgraduate learners with the research foundations and legal frameworks vital for innovation and entrepreneurship in technology and business.

**Open Elective Courses (OE):** These elective courses are chosen from disciplines unrelated to the student's main area of study, aiming to broaden their exposure and knowledge base. As per the Choice Based Credit System (CBCS) policy, students may opt for open elective courses offered by other disciplines within the college, enhancing the diversity of their learning experience.

**Ability Enhancement Course (AEC):** AE is designed to enhance skills and proficiencies related to the student's main discipline. It aims to provide practical training and hands-on experience, contributing to the overall development of students pursuing academic programmes.

**Skill Enhancement Course (SEC):** SE focus on developing specific skills or proficiencies relevant to students' academic pursuits. While it is open to students from any discipline, SE is particularly beneficial for those within the related academic programme.

**Self-Learning (SL):** A two-credit course designed to foster students' ability for independent and self-directed learning. There are Three Self-Learning Courses:

- 'Global Citizenship Education' a common online course offered to all PG students in Semester I on JosTEL.
- Compulsory MOOC on NPTEL-SWAYAM in Semester I or II
- A Department-Specific Self-Learning Course in Semester III on JosTEL

**Comprehensive Examination (CE):** These examinations cover detailed syllabi comprising select units from courses offered throughout the programme. They are designed to assess crucial knowledge and content that may not have been covered extensively in regular coursework.

**Extra Credit Courses:** To support students in acquiring knowledge and skills through online platforms such as Massive Open Online Courses (MOOCs), additional credits are granted upon verification of course completion. These extra credits can be availed across three semesters (2 - 4). In line with UGC guidelines, students are encouraged to enhance their learning by enrolling in MOOCs offered by portals like SWAYAM, NPTEL, and others. Additionally, certificate courses provided by the college are also considered for these extra credits.

**Outreach Programme (OR):** It is a compulsory course to create a sense of social concern among all the students and to inspire them to dedicated service to the needy.

#### **Course Coding**

The following code system (10 alphanumeric characters) is adopted for Postgraduate courses:

25	UXX	0	XX	00/X
Year of Revision	PG Department Code	Semester Number	Course Specific Initials	Running Number/with Choice

#### **Course Specific Initials**

CC - Core Course

CP - Core Practical

ES - Discipline Specific Elective

AE - Ability Enhancement Course

SL - Self-Learning

OE - Open Elective

PW - Project and Viva Voce

*CE - Comprehensive Examination*

*OR - Outreach Programme*

*IS - Internship*

*RM - Research Methodology*

## **EVALUATION PATTERN (PG)** **Continuous Internal Assessment**

Sl No	Component	Marks Allotted
1	Mid Semester Test	30
2	End Semester Test	30
3	*Two Components (15 + 20)	35
4	Library Referencing	5
	<b>Total</b>	<b>100</b>

*Passing minimum: 50 marks*

\* The first component is a compulsory online test (JosTEL platform) for 15 marks comprising 7 questions (1 mark) at K1 level and 4 questions (2 marks) at K2 level; The second component is decided by the course in-charge in accordance with the prescribed K levels.

### **Question Paper Blueprint for Mid and End Semester Tests**

Duration: 2 Hours		Maximum Marks: 60					
Section	K1	K levels					Marks
		K2	K3	K4	K5	K6	
A (compulsory)	7						$7 \times 1 = 7$
B (compulsory)		5					$5 \times 3 = 15$
C (either...or type)			3				$3 \times 6 = 18$
D (2 out of 3)	Mid Sem			1(2)	1*		$2 \times 10 = 20$
	End Sem				1(2)	1*	
							<b>Total</b>
							<b>60</b>

\* Compulsory

### **Question Paper Blueprint for Semester Examination**

Duration: 3 Hours		Maximum Marks: 100					
Section	K1	K levels					Marks
		K2	K3	K4	K5	K6	
A (compulsory)	10						$10 \times 1 = 10$
B (compulsory)		10					$10 \times 3 = 30$
C (either...or type)			5				$5 \times 6 = 30$
D (3 out of 5)				1(2)	1(2)	1*	$3 \times 10 = 30$
							<b>Total</b>
							<b>100</b>

\* Compulsory

## Evaluation Pattern for One/Two-credit Courses

Title of the Course	CIA	Semester Examination	Final
• Ability Enhancement Course	$20 + 10 + 20 = 50$	50 (Department)	100
• Self - Learning Course (Dept. Specific) • Comprehensive Examination	$25 + 25 = 50$	50 (CoE)	100
• Internship • Self - Learning Course (Common) • Self - Learning Online Course (NPTEL / SWAYAM)	100	-	100
• Skill Enhancement Course: Soft Skills	100	-	100
• Project Work and Viva Voce	100	100	100

### Grading System

The marks obtained in the CIA and semester for each course will be graded as per the scheme provided in Table - 1.

From the second semester onwards, the total performance within a semester and the continuous performance starting from the first semester are indicated by Semester Grade Point Average (SGPA) and Cumulative Grade Point Average (CGPA), respectively. These two are calculated by the following formulae:

$$SGPA \text{ and } CGPA = \frac{\sum_{i=1}^n C_i Gp_i}{\sum_{i=1}^n C_i}$$

$$WAM = \frac{\sum_{i=1}^n C_i M_i}{\sum_{i=1}^n C_i}$$

Where,

*C<sub>i</sub>* - credit earned for the Course *i*

*G<sub>pi</sub>* - Grade Point obtained for the Course *i*

*M<sub>i</sub>* - Marks obtained for the Course *i*

*n* - Number of Courses **passed** in that semester

WAM - Weighted Average Marks

**Table - 1: Grading of the Courses for PG**

Mark Range	Grade Point	Corresponding Grade
90 and above	10	O
80 and above and below 90	9	A+
70 and above and below 80	8	A
60 and above and below 70	7	B+
50 and above and below 60	6	B
Below 50	0	RA

**Table - 2: Grading of the Final Performance for PG**

CGPA	Grade	Performance
9.00 and above	O	Outstanding*
8.00 to 8.99	A+	Excellent*
7.00 to 7.99	A	Very Good
6.00 to 6.99	B+	Good
5.00 to 5.99	B	Above Average
Below 5.00	RA	Re-appear

*\*The Candidates who have passed in the first appearance and within the prescribed duration of the PG programme are eligible. If the Candidates Grade is O/A+ with more than one attempt, the performance is considered "Very Good".*

## **Vision**

Forming globally competent, committed, compassionate and holistic persons, to be men and women for others, promoting a just society.

## **Mission**

- Fostering learning environment to students of diverse background, developing their inherent skills and competencies through reflection, creation of knowledge and service.
- Nurturing comprehensive learning and best practices through innovative and value- driven pedagogy.
- Contributing significantly to Higher Education through Teaching, Learning, Research and Extension.

### **Programme Educational Objectives (PEOs)**

1. Graduates will be able to accomplish professional standards in the global environment.
2. Graduates will be able to uphold integrity and human values.
3. Graduates will be able to appreciate and promote pluralism and multiculturalism in working environment.

### **Programme Outcomes (POs)**

1. Graduates will be able to apply assimilated knowledge to evolve tangible solution to emerging problems.
2. Graduates will be able to analyze and interpret data to create and design new knowledge.
3. Graduates will be able to engage in innovative and socially relevant research and effectively communicate the findings.
4. Graduates will become ethically committed professional and entrepreneurs upholding human values.
5. Graduates imbued with ethical values and social concern will be able to understand and appreciate cultural diversity, social harmony and ensure sustainable environment.

### **Programme Specific Outcomes (PSOs)**

1. Gaining scientific and professional knowledge of human behaviors and improving the psychological condition of individuals, organizations and society
2. Mastering the micro and macro skills of Counselling from a psychological perspective while understanding and adhering to the legal and ethical issues of professional counselling
3. Comprehending advancement of Psychology, Models of Counselling, Human development, Psychopathology, Assessment and Intervention techniques and tools applicable to multicultural settings
4. Administering Psychological Testing on self and develop hands on training experiences to conduct the various psychological tests to the specific populations depending on the assessed needs
5. Integrating teaching and learning process leading to the culmination of paper/project work based on a theoretical orientation and research methodology that best fits one's personality

Semester	Course Code	Title of the Course	Hours / Week	Credits
1	25PCP1CC01	Core Course - 1: Advance General Psychology	6	5

Course Objectives	
To learn about the historical background of psychology, sub-fields of psychology and the different methods used in the study of psychology	
To learn about the nervous system	
To learn about the functions of five senses including perception and attention	
To learn about the process of learning	
To understand the use of memory and how to improve it.	

### UNIT I: Definition of psychology (18 Hours)

Definition of Psychology – Historical Background: functionalism, structuralism - Sub-fields of psychology: Experimental, Biological, Personality, Social, Clinical and Counselling, Development and quantitative psychology - Methods used in psychology: Survey, Case Study, Naturalistic, Observation and Experiment. History of Indian Psychology

### UNIT II: The Nervous System (18 Hours)

Central Nervous System (CNS) and Peripheral Nervous System (PNS) - Communication in the Nervous system and interaction among neurons- Neurotransmitters and their functions - The Spinal cord and its functions - the Brain and its functions

### UNIT III: The Five Senses (18 Hours)

Their characteristics - Definition of perception - Features of perception - Approaches to perception - Constructional view of perception - Ecological view of perception – Psychophysics. Attention – Types of attention - Determinants of attention - Selective focused and divided attention.

### UNIT IV: Learning (18 Hours)

Definition of learning; theories of learning; Classical Learning - Instrumental and operant conditioning Learning - Observational Learning - Cognitive Process in Learning.

### UNIT V: Memory (18 Hours)

Types and Stages of Memory: Sensory Memory, Short-term Memory and Long-term Memory; Causes of forgetting - Constructing Memory - Improving Memory.

Teaching Methodology	Chalk & Talk, Videos, PPTs, Demonstration, Case Studies and Field Visit
Assessment Method	MCQs, Seminars, Group discussion, Quiz, Dyad and triad experiments, group work

Semester	Course Code	Title of the Course	Hours/Week	Credits
1	25PCP1CC02	Core Course - 2: Developmental Psychology	6	5

Course Objectives	
To understand human development across the lifespan.	
To explore major theories and their implications for development.	
To analyze genetic and environmental influences on individual traits.	
To assess key developmental milestones and transitions.	
To apply an integrative approach to life stage adaptation.	

#### **UNIT I: A Bio-Psycho-social approach (18 Hours)**

The interaction of the Biological, Psychological and Social systems (Eriksonian Life stage, developmental tasks, Psychosocial crisis, Central process, Prime adaptive ego quality, Core pathology, Applied topics); Psychosocial impact of poverty; unemployment; violence; Major theories for Understanding Human and implications and links to Psychosocial theory. Purusharthas (Four Life Goals) and Ashrama Dharma (Four Stages of Life).

#### **UNIT II: Stages of human development: Period of Pregnancy & Prenatal development**

**(18 Hours)**

Genetics and Development; Normal Fetal Development; the Birth Process; The Mother, Fetus and Psychosocial development; The Impact of Culture; Applied topic: Abortion; Case study

#### **UNIT III: Period of Toddlerhood, Early School age and Childhood (18 Hours)**

Developmental Tasks of The Period of Toddlerhood, Early School age and Childhood; the Psychosocial Crisis; The Central Process; The Prime Adaptive Ego Quality and the Core Pathology; Applied topic such as Day Care, School Readiness, Violence in the lives of the Children; Case study

#### **UNIT IV: Period of Adolescence (18 Hours)**

Developmental Tasks; The Psychosocial Crisis; The Central Process; The Prime Adaptive Ego Quality and the Core Pathology; Applied topics: Addictions to Alcohol and Drug abuse; Sexual Attention and Sexually Transmitted Diseases; Case study.

#### **UNIT V: Period of Adulthood & Old Age (18 Hours)**

Developmental Tasks; The Psychosocial Crisis; The Central Process; The Prime Adaptive Ego Quality and the Core Pathology; Applied topics: Marriage; Separation; Divorce; Discrimination in the work place; Retirement and Meeting the needs of the Frail Elderly; Terminally ill; Case Study.

<b>Teaching Methodology</b>	Power Point Presentation, Group Discussion, Lecture, Video Presentation and Case Study
<b>Assessment Method</b>	MCQs, Seminars, Group discussion, Quiz, Dyad and triad experiments, group work

Semester	Course Code	Title of the Course	Hours / Week	Credits
1	25PCP1CP01	Core Practical – 1: Counselling Techniques	2	1

Course Objectives	
To introduce various psychological counselling techniques as tools for helping professionals	
To get acquainted with evolving psychological techniques and use them effectively in professional setting	
To obtain a deeper understanding of the problem situations of the clients	
To review the level of competence of the helping professionals	
To enhance quality of life and help the client adopt essential techniques to improve mental health	

**Unit I: Psychodynamic Techniques** (6 Hours)

Free association; Interpretation; Dream Analysis and analysis and interpretation of Resistance

**Unit II. Behavior techniques** (6 Hours)

Simple relaxation techniques; Progressive muscle relaxation; Systematic desensitization; Flooding; Eye movement Desensitization and Reprocessing (EMDR); Social Skills Training; Assertion Training

**Unit III. Cognitive Behaviour Therapy** (6 Hours)

Disputing irrational beliefs; Doing cognitive home work; Role playing; Modelling; Use of humour; Learning new coping skills; Role playing; Changing one's language

**Unit IV. Feminist Therapy** (6 Hours)

Biblio-therapy; journal writing; assertiveness training; cognitive restructuring; role playing; group work; challenging untested beliefs and social action

**Unit V. Post-Modern approaches** (6 Hours)

Solution Focused therapy- Change Talk; Creative use of questioning; miracle question and scaling question; Narrative therapy –Telling One's Story (Putting Together a Narrative); Externalization and naming technique; Deconstruction Technique, Crisis and Trauma Counselling.

Teaching Methodology	Power Point Presentation, Video Presentation, Demonstration, Dyad Triad Practices, you tube Videos
Assessment Method	MCQs, Seminars, Group discussion, Quiz, Dyad and triad experiments, group work

Semester	Course Code	Title of the Course	Hours	Credits
1	25PCP1ES01A	Discipline Specific Elective – 1: Social Psychology	4	3

Course Objectives	
To evaluate their own Attitudes and Pro-social Behaviour: Interpersonal Attraction, Rejection & close Relationships	
To sensitize the psychological aspect of various social issues in the society and Nation	
To analyse the various sources of psychological aspects of social phenomena	
To demonstrate the ability to articulate independently and creatively about human social behaviour and the cultural influences that affect our behaviour.	
To analyze various cognitive errors	

### **Unit I: History and background (12 Hours)**

Definition. Focus of social psychology. Origin & development. Methods of social psychology (briefly) Social Psychology Compared with Personality Psychology & Other Social Sciences. Gestalt psychology, Kurt Lewin, (father of modern experimental social psychology). Role of psychology in National development: Issues of development, psychological solutions.

### **Unit II: Social Cognition (12 Hours)**

Schemas. Self-fulfilling prophecy (Illustrations in Indian setting). Heuristics; Priming; Automatic processing. Potential sources of error in social cognition: Automatic vigilance, optimistic bias, counterfactual thinking, magical thinking, illusory correlation, regression fallacy. Affect in social cognition: How thoughts shape feelings and feelings shape cognition. Combating errors in social cognition

### **Unit III: Attitudes and Pro-social Behaviour (12 Hours)**

Definition, nature, components, functions. Attitude formation and change. Attitude Vs Actions; Attitude and behaviour (briefly). LaPierre's study: Persuasion. Resistance to persuasion (briefly). Cognitive dissonance; Hypocrisy. (Illustrations and analyses of Indian/ Tamil Nadu cases) Responding to emergency; Steps: Classic studies and experiments. The helpers and those who receive help (briefly). Altruistic personality, volunteering. Explaining pro-social behaviour: Empathy altruism model, negative state relief model, empathic joy hypothesis, genetic determinism

### **Unit IV: Social Perception, Social Influence; Interpersonal Attraction, Rejection & Close Relationships (12 Hours)**

Micro expressions: cognitive factors. Attribution. Theories: correspondent inference, Kelley's theory. Attribution errors. Applications in understanding depression and prejudice. Impression formation. Impression management- tactics. Conformity. Asch's experiment. Factors affecting conformity. Norms. Compliance: underlying principles and tactics. Cialdini's work. Obedience. Milgram's experiment. Intense indoctrination (briefly). (Illustrations and analyses of Indian/ Tamil Nadu cases)

### **Unit V: Interpersonal Attraction, Rejection & Close Relationships (12 Hours)**

Beginning of attraction: Proximity, emotions, Affiliation needs. Becoming acquainted situational determinants (briefly). Moving towards friendship - similarity, mutual liking. Predicting marital happiness and stability from newlywed interactions, Sexual strategies theory: A evolutionary perspective on human mating Commitment and satisfaction in romantic associations: A test of the investment model.

Teaching Methodology	Power Point Presentation, Video Presentation, Demonstration, Dyad, Triad Practices, you tube Videos
Assessment Method	MCQs, Seminars, Group discussion, Quiz, Dyad and triad experiments, group work

Semester	Course Code	Title of the Course	Hours	Credits
1	25PCP1ES01B	Discipline Special Elective - 1: Rehabilitation Counselling	4	3

Course Objectives
To understand the reality of disability and kinds of disability
To learn to develop knowledge and skills to help the people with disability and special population.
To develop an attitude to respect diversity.
To employ strategies and techniques to support persons of disability
To understand the significance of NGOs and their contributions to rehabilitation programme

### **UNIT I: History and Philosophy of Disability (12 Hours)**

Nature and Scope of Rehabilitation psychology- Definition, historical perspective, scope and methods, Functions of Rehabilitation Psychology: General functions, Special functions, History and Philosophy of Disability Rehabilitation in India. Goals and objectives of rehabilitation, Multi-disciplinary approach to rehabilitation: Biological, medical, psychological, educational and social aspects

### **UNIT II: Types of disabilities (12 Hours)**

Disability - Concept and definitions, Classification of various disabilities, Incidence and Prevalence, Types of disabilities: Visual impairment, Hearing and speech impairment, Locomotor, disability, Mental retardation, Cerebral palsy, Autism, Mental illness Learning disabilities, Multiple handicaps, Etiological factors; pre-natal, natal and post- natal, chromosomal aberrations and genetic errors, Prevention of disabilities

### **UNIT III: Assessment (12 Hours)**

Personality Development of Disabled Persons and intervention- Factors influencing personality development of disabled individuals, Life span, development of people with disabilities, Assessment of personality of disabled individuals, Screening and early identification of people with developmental disabilities. Social, Psychological Perspective in Rehabilitation Psychology.

### **UNIT IV: Psychological Interventions (12 Hours)**

Psychological Intervention- Planning Intervention: Psychoanalytic Approach, Learning Theories and Strategies, Planning and Designing, Learning Situations, Counselling Strategies. Therapeutic services and Restorative techniques. Designing Training Programmes for Professionals: Training Need Analysis, Implementation of Training Programmes Monitory and Impact Studies.

### **UNIT V: NGOs (12 Hours)**

Organization & Management- Evolution of Non-Government Organizations Background Characteristics of Organization -Capacity Building of Non-Government Organizations.

Teaching Methodology	Power Point Presentation, Video Presentation, Lecture, Field Visit and Case Study
Assessment Method:	MCQs, Seminars, Group discussion, Quiz, Dyad and triad experiments, group work

1	25PCP1AE01	<b>Ability Enhancement Course:</b> Computer Applications in Psychology	2	1

<b>Course Objectives</b>	
To gain proficiency in MS Word and Excel for document creation, data entry, formatting, and statistical analysis.	
To utilize internet services for browsing psychology-related websites, accessing scientific journals, for academic communication.	
To apply statistical software (SPSS) for data modification, and analysis in psychological research.	
To analyse data using descriptive statistics such as mean, median, mode, variance, and standard deviation with MS Excel and SPSS.	
To perform correlation analysis and statistical tests and interpret their applications in counselling psychology.	

#### **UNIT I: MS Office-I** **(6 Hours)**

MS word: Creating, Opening and saving files- Editing and formatting text- spell and grammar check auto correct- creating of tables and columns- mail merge.

#### **UNIT II: MS Office-II and Internet Services** **(6 Hours)**

MS Excel: Work sheet- entering data and creating work sheets and work books- opening and saving workbooks. Internet Services: Use of Internet Services – Creating e-mail- sending mails- browsing websites of Psychology, browsing scientific journals- search engines- data storing. Psychology based practice problem using MS Excel.

#### **UNIT III: Statistical Packages.** **(6 Hours)**

Use of Statistical Packages in Psychological Researches - Introduction to SPSS – Purposes – Using the Windows in SPSS Windows – SPSS file types – Defining variable- Entering data – Saving a data file – Opening a data file – Data entry exercise - Creating and modifying Data Files.

#### **UNIT IV: Descriptive Statistics** **(6 Hours)**

Nominal, Ordinal, Interval, and Ratio - Mean, Median, Mode - Measures of Dispersion: Range, Variance, and Standard Deviation. Data visualization: Graphs, Tables, and Histograms. Practice problem using MS Excel and SPSS.

#### **UNIT V: Correlation and Statistical tests** **(6 Hours)**

Correlation: Positive and Negative linear correlation, Linear and curvilinear, Strength of the relationship – Pearson correlation coefficient, Zero strength of the correlation. Statistical tests: t-tests (Independent & Paired) - ANOVA (One-way & Two-way) - Chi-square test- Application of inferential statistics in counselling psychology and Practice problem using.

<b>Teaching Methodology</b>	Chalk and talk, PPT, Graphical representation using software, Simulation
<b>Assessment Method</b>	MCQs, Seminars, Group discussion, Quiz, Dyad and triad experiments, group work

Semester	Course Code	Title of the Course	Hours/ Weeks	Credits
1	25PGC1SL01	Global Citizenship Education	Online	1

Course Objectives
To develop an understanding of global governance structures, rights and responsibilities.
To recognize and respect differences, multiple identities and diversity.
To examine beliefs and perceptions about social justice, equality and civic engagement.
To develop attitudes of care and empathy for others and the environment.
To develop global competence and ethical considerations by enhancing communication and collaboration skills across cultures

### **UNIT I: Introduction to Global Citizenship**

01. Historical and Philosophical Foundations of Global Citizenship
02. Rights and Responsibilities of Global Citizenship
03. Key Organizations and Movements Promoting Global Citizenship

### **UNIT II: Globalization and Its Impact on Society**

04. Globalization and Its Key Drivers
05. Positive and Negative Impacts of Globalization
06. Role of Education in Fostering a Global Perspective

### **UNIT III: Human Rights, Social Justice, Equality and Diversity**

07. Key Human Rights Treaties, Frameworks and Declarations
08. Advocacy, Activism, and Movements for Social Justice and Equality
09. Global Challenges to Human Rights, Equality and Diversity

### **UNIT IV: Sustainable Development and Environmental Responsibility**

10. The Sustainable Development Goals and Their Relevance to Global Citizenship
11. Climate Change, Environmental Degradation and Sustainable Development
12. Strategies for Promoting Environmental Responsibility

### **UNIT V: Building Global Competence and Engagement**

13. Effective Communication and Collaboration Across Cultures
14. Volunteering and Community Engagement in Global Initiatives
15. Ethical Considerations in Global Citizenship

<b>Teaching Methodology</b>	Recorded Lectures/Videos, Reading Materials, PPTs, Case Studies, Collaborative Projects, Quizzes and Polls
<b>Assessment Methods</b>	Seminars, Assignments, MCQs, Reflection Essays, Group Project Presentations, Problem-Solving Scenarios

Semester	Course Code	Title of the Course	Hours/Week	Credits
2	25PCP2OE02	Open Elective - 2 (BS): Artificial Intelligence in Psychology	4	2

Course objectives
To understand the fundamental concepts of Artificial Intelligence (AI) and its applications in counselling.
To explore AI-driven psychological assessment tools and their effectiveness in mental health care.
To analyze ethical, legal, and social implications of AI in counseling practices
To develop practical skills in using AI-powered chat bots, virtual therapists, and sentiment analysis tools
To evaluate the future trends and challenges in AI-assisted counselling

### **Unit 1: Introduction to AI in Counseling (12 Hours)**

Basics of Artificial Intelligence and Machine Learning; Role of AI in mental health and psychological support; AI vs. Human Counselors: Strengths and Limitations; AI-powered tools in mental health (e.g., chat bots, virtual therapists); Case studies on AI-assisted counselling

### **Unit 2: AI-Driven Psychological Assessments (12 Hours)**

Introduction to AI in psychological diagnostics; AI-powered behavioral and sentiment analysis; Speech and text analysis for emotional recognition; AI for early detection of mental health disorders; Limitations and accuracy concerns in AI-driven assessments

### **Unit 3: Ethical, Legal, and Social Implications (12 Hours)**

Ethical considerations in AI counseling (bias, privacy, and consent); Legal and regulatory frameworks governing AI in therapy; Data privacy and security in AI-powered counseling tools; The human touch vs. AI: Ethical dilemmas in mental health interventions; Addressing biases in AI-driven mental health solutions

### **Unit 4: AI Applications in Therapy and Intervention (12 Hours)**

AI-powered therapy models (CBT-based chatbots, emotion-aware AI); AI in crisis intervention and suicide prevention; Personalized treatment plans using AI; Case studies: AI in addiction therapy, stress management, and trauma recovery; AI for self-care and mindfulness applications

### **Unit 5: Future Trends and Challenges in AI-Assisted Counseling (12 Hours)**

Emerging trends in AI and mental health; The role of AI in personalized counseling services  
Human-AI collaboration in psychotherapy; Addressing challenges in AI adoption in counseling; Future research directions and innovations

<b>Teaching Methodology</b>	Lectures, Power Point Presentation, Video Presentation
<b>Assessment Method</b>	Computer Practical, MCQs, Seminars, Group discussion,

Semester	Course Code	Title of the Course	Hours/Week	Credits
2	25PSS2SE01	Skill Enhancement Course: Soft Skills	4	2

Course Objectives	
To provide a focused training on soft skills for students in colleges for better job prospects	
To communicate effectively and professionally	
To help the students take active part in group dynamics	
To familiarize students with numeracy skills for quick problem solving	
To make the students appraise themselves and assess others	

### **Unit I: Effective Communication & Professional Communication (12 Hours)**

Definition of communication, Barriers of Communication, Non-verbal Communication; Effective Communication - Conversation Techniques, Good manners and Etiquettes; Speech Preparations & Presentations; Professional Communication.

### **Unit II: Resume Writing & Interview Skills (12 Hours)**

Resume Writing: What is a résumé? Types of résumés - Chronological, Functional and Mixed Resume, Purpose and Structure of a Resume, Model Resume.

Interview Skills: Types of Interviews, Preparation for an interview, Attire, Body Language, Common interview questions, Mock interviews & Practicum

### **Unit III: Group Discussion & Personal effectiveness (12 Hours)**

Basics of Group Discussion, Parameters of GD, Topics for Practice, Mock GD & Practicum & Team Building. Personal Effectiveness: Self Discovery; Goal Setting with questionnaires & Exercises

### **Unit IV: Numerical Ability (12 Hours)**

Introducing concepts Average, Percentage; Profit and Loss, Simple Interest, Compound Interest; Time and Work, Pipes and Cisterns.

### **Unit V: Test of Reasoning (12 Hours)**

Introducing Verbal Reasoning: Series Completion, Analogy; Data Sufficiency, Assertion and Reasoning; and Logical Deduction. Non-Verbal Reasoning: Series; and Classification

<b>Teaching Methodology</b>	Chalk and talk, Lectures, Demonstrations, PPT.
<b>Assessment Method:</b>	Presentations; Resume writing; interviewing; MCQs, GD, online test

Semester	Course Code	Title of the Course	Hours/Week	Credits
3	25PCP3CC07	Core Course - 7: Group Counselling and Psychotherapy	6	5

Course Objectives
To explore various group therapies that have emerged
To learn appropriate styles and techniques for Group Therapy
To use the Counselling skills and techniques with the experimental groups
To master the skills and understand how to modify them to fit specialized groups
To understand group behaviour in various situations

**UNIT I: Historical background of group Counselling** (18 Hours)  
Background; Pioneers in this field of counselling; Team and Group; Leader as a person; Counselling approach in Bhavad Gita

**UNIT II: Interpersonal learning and Stages of Group** (18 Hours)  
The Importance of Interpersonal Relationship; The Corrective Emotional Experience; The Group as Social Microcosm - A dynamic Interaction; Transference and Insight; the process of socialization. Various stages of Group therapy.

**UNIT III: The Therapeutic Factors** (18 Hours)  
Yalom's list of therapeutic factors: Instillation of Hope; Universality; Imparting information; Altruism; The Correlative Recapitulation of the Primary Family Group; Development of Socializing Techniques; Imitative Behavior.

**UNIT IV: Creation of the Group: Group Leader's competencies:** (18 Hours)  
Competencies needed for a leader to deal with the tasks during various stages of group; Formation of a group: Place, time, size and Preparation; Sub grouping; Conflict in the Therapy Group; Self-Disclosure; Termination; Problem Patients; Dreams; audio visual Technology; Written summaries; Structured exercises; Choosing the Co-leader. Therapist's Basic Tasks; Creation and maintenance of the Group; Transference & Transparency; How does the leader shape norms? Working in the Here - and now; Definition of Process; Process focus; Helping patients to accept a Process orientation; The use of the Past

**UNIT V: The Specialized Therapy Group:** (18 Hours)  
Integration and application; Clinical situations - Basic Steps; Antecedents and Evolution of the Encounter Group; The Effectiveness of the Encounter Groups; observation of Experienced Clinicians; Supervision. Ethical and Professional issues.

Note: The students will undergo group counselling and learn from experience about themselves in a group as well as how to conduct a group.

Teaching Methodology	Power Point Presentation, Video Presentation, Lecture, Group discussion, Participating in Group Therapy, Role Play and Case Study
Assessment Method	Group work, Group counselling; Practicing techniques; Psychotherapy

3	25PCP3CC08	Core Course - 8: Psychopathology – 2	6	4

Course Objectives	
To introduce the students to the diversity and complexity of psychological issues	
To understand the basic tools available in the field of psychiatry	
To identify the various psychological disorders as defined in the DSM.	
To initiate the students into the Process of Psychiatry for Mental Health professionals	
To equip the students with broad spectrum of strategies for Diagnosis, Assessment and interventions programs for psychopathology	

### **UNIT I: Psychological Disorders (18 Hours)**

Classification of disorders; Psychotic disorders; Neurotic disorders; Schizophrenia: Diagnosis, Characteristic symptoms; Poor diagnosis and good diagnosis; Subtypes; Differential Diagnosis; Not otherwise specified; Epidemiology; Etiology; Treatment; Pharmacotherapy and Non-Pharmacotherapy; Psychopathology in Indian context.

### **UNIT II: Mood disorders (18 Hours)**

Unipolar (Depressive); Bipolar disorders; Major depressive disorder; Dysthymic disorder, Depressive disorder not otherwise specified (NOS); Diagnostic Criteria; Epidemiology; Etiology; Treatment; Pharmacotherapy and Non-Pharmacotherapy

### **UNIT III: Personality disorders (18 Hours)**

Diversity and Complexity of personality & Personality Disorders; Paranoid personality disorder; Schizoid Personality Disorder; Schizotypal Personality disorder; Antisocial Personality Disorder; Borderline Personality Disorder; Histrionic Personality Disorder; Narcissistic Personality disorder; Avoidant Personality Disorder; Dependent Personality Disorder; Obsessive Compulsive Personality Disorder, Multiple Personality Disorder (Profile, Diagnosis, Etiology, Epidemiology, Treatment).

### **UNIT IV: Special Problems: Substance Related Disorders and Suicide (18 Hours)**

Addictions; Alcohol and drug abuse: Diagnosis associated with class of substances; Causes of Alcohol and Drug abuse; Treatment of Alcohol and Drug abuse; Eating Disorders (Etiology and Treatment); Suicide: Intentional destruction; Myths about suicide; Epidemiology; Risk Factors; Biological Factors; Assessing the Suicide Patient; treating the Suicidal Patient; Internet Addiction and Pathological Gambling.

### **UNIT V: Human Sexuality (18 Hours)**

Attitude towards sex; Sexual Response Cycle; Phases of sexual response cycle; homosexuality; Sexual disorders: Dysfunction versus Deviation; Medical and Psychological Causes of sexual disorders; Treatment (Pharmacotherapy & Psychotherapy) for sexual dysfunctions and Deviations and Gender Identity Disorder

<b>Teaching Methodology</b>	Power Point Presentation, Video Presentation, Lecture, Field Visit and Case Study
<b>Assessment Method</b>	Case study, MSE, Interviewing techniques; Presentations, group work

Mean Overall Score										2.3 (High)

Semester	Course Code	Title of the Course	Hours	Credits
3	25PCP3CC09	Core Course – 9: Research Methodology	4	3

Course Objectives				
To understand the fundamental Concepts of research				
To Demonstrate the ability to select and formulate research problems				
To distinguish between different types of research				
To apply research design principles and select appropriate data collection methods				
To Demonstrate proficiency in data processing and data interpretation				

### **Unit – I: Basic Concepts & Types of Research (12 Hours)**

Research - meaning, nature, scope, process and needs; qualities of a researcher; Types of research, selecting a topic for research, Research Problem selection, formulation and statement; review of literature; theories and models. Feasibility study; pilot study; variables and hypothesis: Meaning, types and sources,

### **Unit – II: Research Design & Data Collection (12 Hours)**

Research Design- meaning, types and interdependence of designs; Data collection- Primary methods: observation, interview, questionnaire and survey- Secondary methods: Books, documents (published and unpublished) survey reports, biographies.

### **Unit – III: Sampling Techniques & Scaling (12 Hours)**

Population, universe; sampling – meaning, need, advantage, disadvantage, types: probability sampling - simple random, stratified, systematic, cluster; non-probability sampling -quota, convenience, purposive, judgment; sampling frame, sample units and sample size, sampling Errors; Scaling techniques – construction, reliability and validity; attitude scales - meaning, importance and types (Likert scale and Semantic differential scale).

### **Unit – IV: Data Processing & Analysis (12 Hours)**

Data processing - editing, coding, classification and tabulation, Data analysis – Frequency distribution; Measures of central tendency - mean, median and mode; Measures of dispersions, mean and standard deviations; Measure of association - Correlation, Rank Correlation and regression analysis; Test of Hypothesis - parametric tests: student ‘t’ -test and analysis of variance (one-way classification) and non-parametric test (chi-square test), diagrammatic & graphic presentations - significance and types (bar-charts and pie-diagrams). Learning Statistical applications in the Computer Lab; SPSS and JAMOVI

### **Unit – V: Data Interpretation & Report Writing (12 Hours)**

Interpretation of data - meaning, importance and interpretation; Report writing - outline of a research report, the content of the research report, and types of research report. Research Ethics, IPR, Plagiarism, Citation, footnotes, Bibliography and reference writing, (APA and Harvard model) and guidelines for writing a standard research report and oral report presentation.

Teaching Methodology	PPT, Lectures and Discussions, Group Activities, peer review, Ethics discussion, Practical exercise, Journal articles presentation, Critical thinking exercise
Assessment Method	Quiz, group work, analysis, practicing SPSS

3	25PCP3CP03	Core Practical – 3: Psychological Testing (Fully Internal)	6	4

Course Objectives	
To introduce key concepts of psychological testing, including validity, reliability, and standardization.	
To understand the assessment of intelligence, personality, motivation, and psychiatric disorders.	
To apply ethical guidelines in psychological testing and provide appropriate feedback.	
To analyze and interpret test scores for IQ, personality, and other psychological traits.	
To integrate theoretical knowledge with practical testing skills for client assessment and guidance.	

### Unit- I: Historical Background (18 Hours)

Introduction: Historical background to the field of psychological testing; types of tests, Use of tests.

### Unit- II: Ethical Principles (18 Hours)

Theory behind tests: Principles of psychological testing, Ethics of testing

### Unit – III: Assessment Tools (18 Hours)

Kinds of tests: Self-report Questionnaires. Tests to assess Intelligence, Structured personality tests, Projective tests, Individual ability tests, aptitude, values, Measures of anxiety and stress

### Unit- IV: Scoring and Interpretations (18 Hours)

Practice: administering various tests, interpreting the scores, and giving feedback

### Unit –V: Integration (18 Hours)

Integrate the knowledge of testing and how they can be used to help people for various needs.

Teaching Methodology	Power Point Presentation, Video Presentation, Field Visit and Case Study
Assessment Method	Self - testing; scoring, interpreting, result analysis

#### Books for Study:

- Unit – I**      *Chapter 1* - Anastasi, A. & Urbina, S. (1997); Chapter 1 – Urbina, S. (1989).
- Unit –II**      *Chapter 18* - Anastasi & Urbina, 1997)
- Unit – III**      *Chapter 15, 16, 18* - Kaplan, R. M. & Saccuzzo, D. P. (1993); Chapter 13 -
- Unit – IV**      *Chapter 8* - Kaplan, R. M. & Saccuzzo, D. P. (1993).
- Unit – V**      *Chapter 22* - Kaplan, R. M. & Saccuzzo, D. P. (1993).

Semester	Course Code	Title of the Course	Hours/Week	Credits
3	25PCP3ES02A	Discipline Specific Elective - 2: Addiction Counselling	4	3

Course Objectives	
To provide an in-depth knowledge of psychopathological conditions as defined in the DSM.	
To enable the students to identify etiology, prevalence of addictions in persons	
To equip the students with broad spectrum of strategies for Diagnosis, Assessment and Intervention programmes of various kinds of addictions besides mental illnesses.	
To enable students to prepare appropriate treatment program for sober.	
To assess the level of addiction & its impact on overall wellbeing	

### UNIT I: Introduction (12 Hours)

Clinical characteristics, epidemiology, etiology, models of addiction: Disease model, Moral model, social model and psychological model

### UNIT II: Presenting Problem (12 Hours)

Understanding use, abuse and dependence. Early Identification (risk and protective factors), Social media, Alcohol & Types of drugs. Non-substance addictions, dual disorders, personality problems

### UNIT III: Assessment and Planning Intervention (12 Hours)

Assessing the level of addiction (AUDIT, DAST-10), Assessing client's motivation, readiness and willingness to change (RCQ-TV, Revised, SOCRATES 8A). Assessing how both individuals and families have become dependent on addiction; Planning to create awareness about the evil effects of addiction and preparing the clients to be ready for treatment to become sober (AASES, BSCQ, ADCQ, What I Want from Treatment, 2.0)

### UNIT IV: Strategies (12 Hours)

Counselling individual and families including children; improving the client's motivation through Motivational Enhancement techniques; 12-Step Programme, Solution-Focused Therapy.

### UNIT V: Process (12 Hours)

Recovery and Relapse; Types of treatment intervention; De-addiction procedure; Psychosocial care - rehabilitation, after care measures. Social support

Teaching Methodology	Power Point Presentation, Video Presentation, Lecture, Seminar, Field Visit to the Treatment Center and Case Study
Assessment Method	MCQs, Group work, GD and case presentations.

Mean Overall Score										2.28 (High)	

Semester	Course Code	Title of the Course	Hours/Week	Credits
4	25PCP4CP04	Core Practical - 4: Supervision (Fully Internal)	5	3

Course Objectives				
To establish minimum standards of ethical practice for counselling psychologists.				
To practice Positive ethics that strives to achieve the highest ethical standards in the profession				
This course enables the students to check one's own belief systems that lay the foundation for ethics				
To present the case studies with peer group members				
To integrate the theoretical learnings with the practicum and internship				

As the final course in the clinical sequence, more advanced goal setting on the part of each student is assumed. Focus of supervision is on Mid and End phase dimensions of counselling and directed toward the termination of internship experience in general.

Students are encouraged to experiment with their expanded conceptual and intervention frameworks. Consolidating their Counselling style, with an eye towards presenting the M.A. Project or M.A thesis, the student will receive general and specific assistance and support.

The supervisory experience will utilize an individual-in-group model, i.e., several individuals present their work each week. The group is utilized in a variety of ways that foster and encourage particular feedback as sought by the intern. Structure of the group is the responsibility of both students present and the supervisor.

A developmental model of supervisee's professional growth is assumed in the group design. The beginning portion of each group session is devoted to community building. The Supervisor will assess the student's performance, learning curve, and the skills acquired, and give marks for a total of 100.

Semester	Course Code	Title of the Course	Hours	Credits
4	25PCP4ES03A	Discipline Specific Elective – 3: Health Psychology	4	3

Course Objectives	
To introduce health psychology concepts, including health behaviors and the mind-body connection.	
To understand the psychological impact of illness, disability, and health-enhancing behaviors.	
To apply health psychology in addressing impairment, disability, and patient care.

4	25PCP4PW01	Project Work and Viva Voce	6	3

The M.Sc. Project or Thesis provides the student with the opportunity to synthesize his or her didactic and clinical learnings of the past two years, which include the psychological, personal and professional dimensions of the students' overall experience. Believing that learning has occurred and that personal synthesis has accompanied the student's journey into the professional counselling community, the project should exemplify the steps taken along the way. The preparation, writing and presentation of the Integration Project or Thesis can be done with scientific research in mind. Students can do the project upon a consultation model with peers. The faculty will be available to guide the students on the development of projects. The guide who helps the student to write the project or thesis and the examiner who evaluates during a Viva will both give marks for a total of 100.

Semester	Course Code	Title of the Course	Hours/Week	Credits
4	25PCP4CE01	Comprehensive Examination	0	2

Course Objectives	
To demonstrate the acquisition of a broad knowledge in counselling psychology /	
To integrate the concepts, principles and theories studied during their course work.	
To allows students develop global view on the various courses	
To assess the student's knowledge of the area(s) of specialization	
To provide a roadmap for further higher pursuit of knowledge and career choices	

#### **UNIT I: Theories of Counselling & Practice**

CO No.	Course Outcomes	
	CO-Statements	Cognitive Levels (K - Level)
	On successful completion of the course, students will be able to learn	
<b>CO1</b>	All the dynamics of counselling and psychology	<b>K1</b>
<b>CO2</b>	The usefulness of various courses offered during the programme	<b>K2</b>
<b>CO3</b>	To apply the knowledge, skills, techniques and practicum for future course of actions	<b>K3</b>
<b>CO4</b>	To determine the level of personal growth and professional development during the course	<b>K4</b>
<b>CO5</b>	The skills of integration of the knowledge and techniques in view of cliental population	<b>K5</b>
<b>CO6</b>	To develop an overall picture of the learning and apply them in therapeutic situations and workplaces	<b>K6</b>

Semester	Course Code	Title of the Course	Hours/Week	Credits
4	25PCW4OR01	Outreach Programme (SHEPHERD)	-	4

Course Objectives
To raise the social awareness of students of this college and motivate them and their teachers to transfer the knowledge and skills they have to rural communities.
To expose the students to rural and urban realities that will result in a personal transformation
To help them serve the masses of this country
To empower rural communities so that they can take up developmental projects for their own welfare.

### Science and Humanities for People's Development (SHEPHERD)

St. Joseph's College, a First Grade College in India, took a daring decision to launch an innovative extension programme through SHEPHERD in the year 1985-86 even before the UGC made extension programme mandatory in all the Universities and Colleges. From then on, the department has taken manifold dimensions of extension activity and it has withstood the test of time and still proves to be a forerunner in this arena.

As on today the college successfully serves in 69 adopted villages and 21 urban areas around the college (with an overall population of 63,000) from five development blocks namely Manikandam, Andanallur, Thogamalai, Kulithalai and Viralimalai, located in Tiruchirappalli, Karur and Pudukkottai districts. Each department adopts a cluster of villages and each class adopts one village each. We call it Shepherdization.

SHEPHERD programme is meant to arouse in the students a sense of social justice, an interest, responsibility, compassion and concern for and sensitivity to the plight of the underprivileged through exposure to the actual living conditions in the slums and villages and by meaningful community service. In short, through this complex process inbuilt in the curriculum, the students of St. Joseph's undergo Shepherdization

**Motto:** "Truth is knowledge in service"
